

RX daytona® Clinical Chemistry Analyzer

Industry Leading, Fully Automated Clinical Chemistry Analyzer

Analyte Categories

- Autoimmune
- Basic Metabolic Profile
- Bone Profile
- Cardiovascular
- Metabolic Profile
- Diabetes
- Electrolytic Balance
- Hemolytic Anemia
- Hepatic Function
- Inflammation & Infection
- Lipids
- Neurological Disorders
- Nutritional Status
- Pancreatic Function
- Renal Function
- Specific Proteins

Key Features

- Broad disease and fluid applicability
 - o Up to 120 individual analytes
 - o Multiple fluids: serum, urine, CSF, etc.
- Colorimetric & UV methods
 - o Kinetic, monochromatic, bichromatic, turbidimetric
- Low sample volume requirement
- Automated sample integrity monitoring
 - o Hemolysis, icterus, lipemia
- Temperature controlled carousel & assay environment for improved assay stability
