Bile Duct Ligation Model of Liver Fibrosis

**Model & Experimental Details**

- **Species:** C57Bl/6 mice
- **Model:** Surgical Ligation of the Common Bile Duct
- **Duration:** 1 Week
- **Endpoints:** Serum, Tissue and Markers of Fibrosis and Damage

**Liver Enzymes**

- ALT, AST, ALP levels compared across Sham, BDL, and BDL + INT-767 groups.

**Serum Urea and Bilirubin**

- Urea and Bilirubin levels compared across Sham and BDL groups.

**Liver Weight**

- Weight comparison between Sham and BDL groups.

* $p<0.05$ vs. Sham; # $p<0.05$ vs. BDL
